MyRapid
Performance Update

Updated Weekly

Welcome to our performance page

...ve share our operational performance with you, key of which is ...netres Between Failures (MKBF).

MKBF in rail refers to the distance trains travel before a failure (resulting in a delay of more than 5 minutes) occurs. Prasarana has set a target to achieve an MKBF of 1 million km for KJL, AGL and KGL respectively, and an MKBF of 150,000 km for MRL by the Third Quarter of 2026.

The following table shows the MKBF for **January 2026**. Subsequent updates will be made on the 20th of every month.

Lines	MKBF
Kelana Jaya	378,482 KM
Ampang	1,613,512 KM
KL Monorail	350,424 KM
Kajang	1,046,096 KM
Putrajaya	1,441,894 KM

In addition to the MKBF, this page will also provide weekly updates on both our Rail and Bus operations. They include ridership, load factor, service availability, reliability and disruptions, incident summary and facilities maintenance.
